Albuquerque, New Mexico

COMPLETE ENGINE POLICY

Thank you for your interest in Cad Company's complete engine program. Below you will find our complete engine policy, terms, and conditions. By making your deposit, you agree to accept this policy.

Ordering and payment:

All complete engines, unless otherwise specified, are built to order. As such, delivery time generally varies between 4 and 12 weeks, depending on the combination and our current workload. A more precise timeframe can usually be given at the time you place your order, but unforeseen factors may affect the actual delivery date. Cad Company requires a minimum 50% deposit (non-refundable) on most engine packages. The preferred method of payment for complete engines is check, money order, or cashiers check. We do not accept foreign money orders.

What you get:

We use the best cores we and/or the customer can find, considering how long they have been out of production. We thoroughly check all critical core components for damage/defects before assembly. All complete engines are fully balanced and blueprinted to Cad Company specs, and run in and base tuned on our state of the art engine dyno, unless otherwise specified, before shipping/ delivery. That, coupled with our many years of experience, allows us to ensure a first class product.

Cad Company's engines, as with most performance/ race engines, are supplied with no warranty expressed or implied. Due to the nature of performance engines in general, the varying uses, operating conditions, and maintenance involved, and the lack of direct control over installation, etc., we cannot make any warranties or claims of fitness for purpose or merchantability for a given purpose. Cad Company, it's officers, employees, and agents, are not responsible for any injury, damage, or loss that may occur as a result of or during the use of our products.

Repair/ overhaul coverage:

As a Cad Company complete engine customer, you are welcome to send the complete engine to us for overhaul or repair for as long as you own it, and we will provide teardown, diagnosis, repair, minor machine work (such as surfacing heads, valve job, etc.), re-assembly, and repeating the dyno break-in and base tuning (as needed) at no charge*. You only pay for shipping and any necessary parts and/or major machine work (such as boring, decking, and crank grinding), at the going rate. An estimate of the cost will be provided prior to billable work being performed. Engine R&R is available for an additional charge if you prefer to bring the entire vehicle to us. Accessories are covered by the manufacturer's warranty only, which is generally replacement part only, if covered.

*These services will be provided at no charge for complete street engines. All engines built to run on pump-gas, with hydraulic cams, are included in this definition.
