Rotating Parts

RB55472 10:1 FORGED PISTONS - 472 CID W/ 76CC HEADS - D-DISH

SKU: RB55472

Cad Company forged pistons - D-Dish - 10:1 compression for 472 CID Cadillac engines with 76cc heads. With coated skirts. Price includes pins. Valve reliefs clear iron and aluminum heads. Uses 1/16" ring pack for reduced friction. Made in USA

Price: \$750.00

RB55176 9:1 FORGED PISTONS - 500 CID - FLAT TOP

SKU: RB55176

Cad Company forged pistons - Flat Top - 9:1 compression for 500 CID Cadillac engines with 120cc heads (or 13:1 w/ 76cc heads). With coated skirts. Price includes pins. No valve reliefs. Uses 1/16" ring pack for reduced friction. Made in USA

Price: \$750.00

RB55174 10:1 FORGED PISTONS - 500 CID W/ 120CC HEADS - DOMED

SKU: RB55174

Cad Company forged pistons - D-Dish - 10:1 compression for 500 CID Cadillac engines with 120cc heads, or 14:1 compression for 500 CID Cadillac engines with 76cc OE or ported OE heads. With coated skirts. Price includes pins. Valve reliefs clear iron and aluminum heads. Uses 1/16" ring pack for reduced friction. Made in USA

Price: \$575.00

RB51120 CAST REPLACEMENT PISTONS WITH PINS FOR CADILLAC 472 AND 500 ENGINES

SKU: RB51120

Cast replacement pistons for Cadillac 472 and 500 Engines, with pins Available in standard (STD), .020", .030", .040", and .060" over bore sizes.

[Read More](#)

Price: \$550.00

RB51110 SILVOLITE CAST REPLACEMENT PISTONS WITH PINS FOR CADILLAC 472, 500, AND 425 ENGINES

SKU: RB51110

Silvolite cast replacement pistons for Cadillac 472, 500, and 425 Engines, with pins. Available in standard (STD), .020", .030", .040", and .060" over bore sizes.

Price: \$390.00

PB11202 BILLET STEEL CRANK HUB (OFFSET)

SKU: PB11202

Offset Billet Steel Crank Hub

This hub has offset flange spacing for correct pulley alignment using non-dampener pulleys with aftermarket performance dampeners that go between the pulley and hub, with the standard 4-bolt pulley pattern. This hub fits all 472 / 500 / 425 / 368 engines, and maintains the correct press-fit.

[Read More](#)

Price: \$190.00

PB11201 BILLET STEEL CRANK HUB

SKU: PB11201

Standard Replacement Billet Steel Crank Hub

This hub is a direct replacement for the stock crank hub, in tougher billet steel form. Suitable for any application for which the factory hub will fit, but you need a replacement (due to a lost or damaged factory hub), or something tougher. This hub fits all 472 / 500 / 425 / 368 engines, and maintains the correct press-fit.

CRANKSHAFTS, STROKER KITS, CRANK HUBS, AND VIBRATION DAMPENERS

Crankshafts, Stroker Kits, Crank Hubs, and
Vibration Dampeners [Read More >>](#)

Cad Company does not sell stroked stock cranks by themselves - we only sell them as complete rotating assemblies. We do sell reconditioned and machined stock cranks, ready to install and aftermarket billet cranks (the same ones in our billet crank stroker kits, as well as made-to order).

Cad Company's stroker kits utilizing stroked stock cranks incorporate all that we have learned over 40+ years of building performance Cadillac engines, and our current recipe has been torture tested to nearly 2k HP. Most home-brew stroker cranks fail sooner or later (usually sooner) on engines making any real power - it's not as simple to build a reliable stroker crank as some would have you believe, but we have worked out the details to offer you a reasonably priced rotating assembly, without having to go through the trial and error method of figuring out what fails and what doesn't.

We offer 2 crank hub options. In most cases you will want the 'standard' hub. The offset hub was primarily for pulley alignment with an obsolete (no longer available) aftermarket dampener. Most '73-older (3-groove) factory pulleys are back-cut to provide clearance for the factory vibration dampener. Some '73-older and most '74-newer (2-groove) factory pulleys, as well as all aftermarket pulleys, are not. All factory hubs have the same spacing, and that's what the 'standard' dampener matches. If you want to use the factory dampener with a late or aftermarket pulley, the offset hub is your best bet, but it will generally require manually shimming the pulley for proper belt alignment (with a stock or standard replacement hub, you would have to machine the clearance into the back of the pulley, IF the pulley you are using has room to do so). You cannot simply use the offset hub and pull the hub outward for belt alignment, as the hub must be pressed on as far as it will go - there are a variety of likely failures if the hub is not pressed on all the way, it's just a matter of what fails first.

The only vibration dampener currently available is sold as a complete unit, with it's own unique hub (pre-assembled together). The

mounting face provides the same pulley alignment as the factory and 'standard' replacement hubs.

RB40111 CRANK KEY

SKU: RB40111

Crankshaft key for timing gear / crank hub for Cadillac 472 / 500 / 425 / 368 engines. The correct factory style key. Nothing special, just the right thing.
