Price: \$5.00 - \$20.00

AF96225 SPUN ALUMINUM AIR CLEANER KIT - TALL

SKU: AF96201

Tall Spun Aluminum Air Cleaner Kit

Includes spun aluminum base, top, 5" air filter element, and stud kit.

This air cleaner kit sits down deep over the carb and has a 5" tall filter for maximum airflow and a killer look. Clears Q-jets great, but will not clear most aftermarket carbs without a carb-to-air-cleaner spacer.

Hand spun base and lid looks and flows great.

[Read More](#)

Price: \$100.00

AF96225 SPUN ALUMINUM AIR CLEANER KIT - SHORT

SKU: AF96225

Short Spun Aluminum Air Cleaner Kit

Includes spun aluminum base, top, 2.5" air filter element, and stud kit.

This air cleaner kit sits down deep over the carb and gives you maximum hood clearance with a standard 14" round air filter. Clears Q-jets great, but will not clear most aftermarket carbs.

Hand spun base and lid looks and flows great.

AF85400 BOOGIEMAN™ ALUMINUM HEADS

SKU: AF85400

The world famous "BoogieMan" cylinder heads are in stock and ready to ship. This is the next step in the "Boogie-Man" line. Using an American made casting, CNC machining, and a top-of-the-line seat and guide machine, we have the absolute best cylinder head for a high performance 472 or 500 Cadillac, on the market today. They have 70cc combustion chamber chambers (adds about 1/2 a point of CR over 76cc iron heads), and include 2.25" / 1.8" valves (the same high-grade stainless steel and production methods used for our iron head valves). These heads have been used on numerous applications from daily drivers to full race applications, and they weigh in at 32 Lbs. (vs. the stock iron head's average weight of 62 Lbs.) per head.

[Read More](#)

Price: \$3,600.00

AF85141 FACTORY REPLACEMENT ALUMINUM HEADS

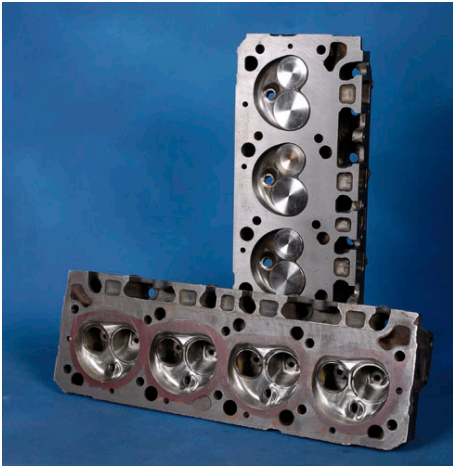

SKU: AF85141

These are the evolved version of the old Bulldog aluminum heads. They have 76cc combustion chambers and include 2.19 / 1.90 stainless valves, and weigh in at 38 Lbs. per head, vs 62 Lbs. per head for your average iron head.

Performance wise, they fall in between our Pro Street and Pro Comp 76cc iron heads. These are a good choice for medium performance levels, where saving weight is more important than bottom end torque, such as lightweight drag cars and gearbox airboats, but you aren't going for maximum power. CNC porting is available, if you need more airflow, but don't have the room for the extra inch of intake height the Boogie Man heads will give you, but they will still not be in the same league for power output.

[Read More](#)

Price: \$3,599.00

AF81420 PRO/COMP HEADS LARGE CHAMBER

SKU: AF81420

PRO/COMP HEADS

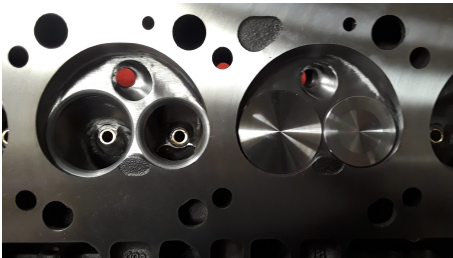

Large Chamber Heads. PRO/Comp cylinder heads also feature fully worked ports, radiused guides, 2.19" intake valves, 1.85" exhaust Chromoly spring cups, dual valve springs, lightweight Chromoly retainers, and hardened valve locks. While the standard package is capable of amazing performance, we do offer (and recommend) upgrades to this package for certain applications, such as Inconel valves for turbocharged applications (the stainless valves are not bulletproof under high exhaust temps), titanium valves and retainers for high RPM roller cam setups, etc.

CORE CHARGE INCLUDED

Fall 2021 - Stock levels change frequently, the ETA for new orders for Pro Comp iron heads is roughly 1-2 weeks if not in stock.

[Read More](#)

Price: \$3,090.00

AF81410 PRO/COMP IRON HEADS SMALL CHAMBER

SKU: AF81410

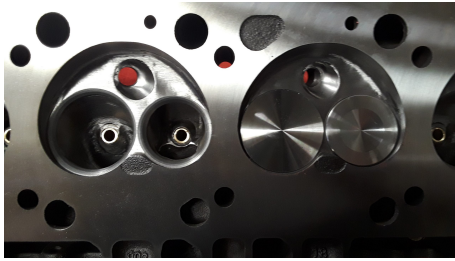

Fully Ported Stainless 2.25/1.9 Valves Three angle valve job, Bronze Guides, Assembled with Dual Springs.

CORE CHARGE INCLUDED

Fall 2021 - Stock levels change frequently, the ETA for new orders for Pro Comp iron heads is roughly 1-2 weeks if not in stock.

[Read More](#)

Price: \$3,270.00

AF81400 PRO/COMP IRON HEADS

SKU: AF81400

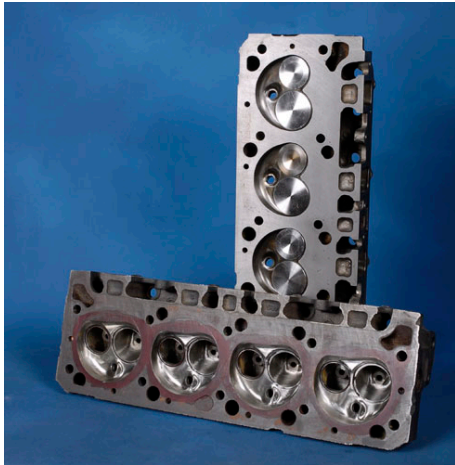

Fully Ported Iron heads. Shot peened, magnafluxed, CBN surfaced. Bronze Guides, Stainless Valves and Competition Valve Job. Assembled with Brass Freeze Plugs and New Spring Kit

CORE CHARGE INCLUDED

Fall 2021 - Stock levels change frequently, the ETA for new orders for iron heads is roughly 1-2 weeks if not in stock.

[Read More](#)

Price: \$3,090.00 - \$3,270.00

AF81320 PRO/STREET IRON HEADS LARGE CHAMBER

SKU: AF81320

PRO/STREET IRON HEADS 120CC

See 'Super Street' Heads . With more port work and reworked combustion chambers, larger 2.18/1.85 Stainless Valves these heads are the best street performance value on the market. They have no trouble supporting a real HP on pump gas, while also maximizing bottom end torque.

CORE CHARGE INCLUDED

Spring 2021 - the ETA for new orders for iron heads is roughly 2 months.

[Read More](#)

Price: \$2,490.00

AF81310 PRO STREET HEADS SMALL CHAMBER

SKU: AF81310

Cad Company Pro/Street mid-level ported heads. 76cc Small chamber castings. Ports, chambers, and bowls ported. 2.19/1.90 Stainless Steel Valves. Bronze Guides. Fully assembled with stage 2 springs and Viton seals.

The Pro/Street 120cc has 2.18/1.85 valves

Price includes a refundable \$470 core charge.

Fall 2021 - Stock levels change frequently, the ETA for new orders for iron heads is roughly 1-2 weeks if not in stock.

[Read More](#)

Price: \$2,670.00

AF81300 PRO/STREET IRON HEADS

SKU: AF81300

Iron heads Ported chambers, valve pockets & port matched. Shot peened, magnafluxed, CBN surfaced. Bronze guides and Stainless valves.

Performance Valve Job & assembled with Brass freeze plugs and new spring kit

76cc has 2.19/1.9 valves

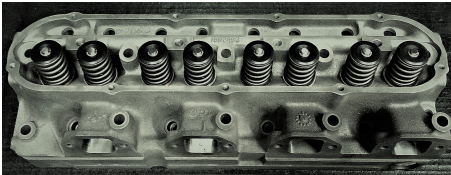

120cc has 2.18/1.85 valves

CORE CHARGE INCLUDED

Fall 2021 - Stock levels change frequently, the ETA for new orders for iron heads is roughly 1-2 weeks if not in stock.

[Read More](#)

Price: \$2,490.00 - \$2,670.00

AF81220 SUPER/STREET STEEL HEADS LARGE CHAMBER

SKU: AF81220

SUPER/STREET STEEL HEADS

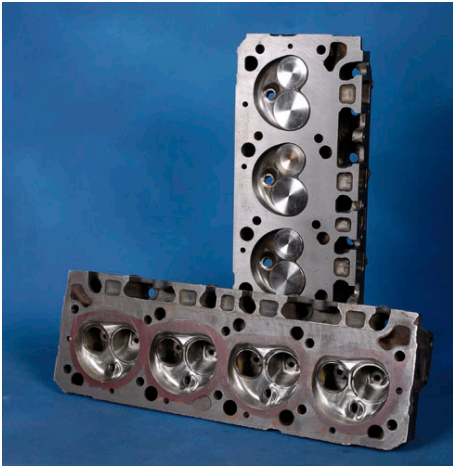

Large Chamber (120cc) heads. Shot-tumbled, magnafluxed, surfaced, and assembled. Intake and exhaust ports are matched to our premium gaskets. Pushrod walls on the intake side are moved back. Ports are smoothed, blended, and polished (the last 1½"). Bronze guide-liners are installed, and three angle seats are cut and hand lapped. Super/Street heads are assembled using oversize 21-4N stainless valves (2.19 / 1.85 valves), special spring shims, performance valve springs (single w/ damper), Chromoly retainers, and hardened valve locks. Valves are not "back cut" to ensure maximum longevity.

CORE CHARGE INCLUDED

Spring 2021 - the ETA for new orders for iron heads is roughly 2 months.

[Read More](#)

Price: \$2,190.00

AF81210 SUPER/STREET IRON HEADS SMALL CHAMBER

SKU: AF81210

Specify 76cc, 120cc, or 425 heads. Shot-tumbled, magnafluxed, surfaced, and assembled. Intake and exhaust ports are matched to our premium gaskets.

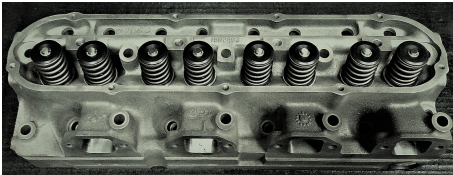

Cad Company Super Street ported heads. Small chamber castings. Ports, bowls, and radiuses done. 2.19/1.90 Stainless Steel Valves. Fully assembled. Price does not include core charge.

CORE CHARGE INCLUDED

Spring 2021 - the ETA for new orders for iron heads is roughly 2 months.

AIR CLEANERS

AF96225 SPUN ALUMINUM AIR CLEANER KIT - TALL

SKU: AF96201

Tall Spun Aluminum Air Cleaner Kit

Includes spun aluminum base, top, 5" air filter element, and stud kit.

This air cleaner kit sits down deep over the carb and has a 5" tall filter for maximum airflow and a killer look. Clears Q-jets great, but will not clear most aftermarket carbs without a carb-to-air-cleaner spacer.

Hand spun base and lid looks and flows great.

AF85400 BOOGIEMAN™ ALUMINUM HEADS

SKU: AF85400

The world famous "BoogieMan" cylinder heads are in stock and ready to ship. This is the next step in the "Boogie-Man" line. Using an American made casting, CNC machining, and a top-of-the-line seat and guide machine, we have the absolute best cylinder head for a high performance 472 or 500 Cadillac, on the market today. They have 70cc combustion chamber chambers (adds about 1/2 a point of CR over 76cc iron heads), and include 2.25" / 1.8" valves (the same high-grade stainless steel and production methods used for our iron head valves). These heads have been used on numerous applications from daily drivers to full race applications, and they weigh in at 32 Lbs. (vs. the stock iron head's average weight of 62 Lbs.) per head.

[Read More](#)

Price: \$3,600.00

AF85141 FACTORY REPLACEMENT ALUMINUM HEADS

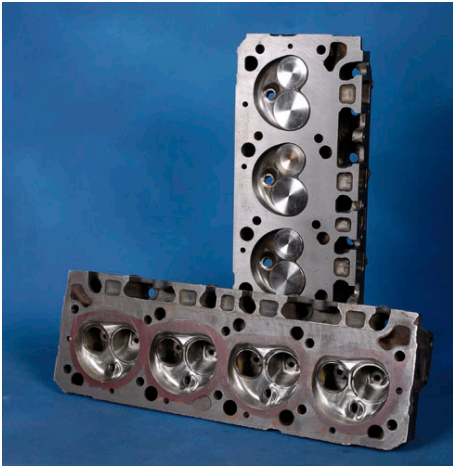

SKU: AF85141

These are the evolved version of the old Bulldog aluminum heads. They have 76cc combustion chambers and include 2.19 / 1.90 stainless valves, and weigh in at 38 Lbs. per head, vs 62 Lbs. per head for your average iron head.

Performance wise, they fall in between our Pro Street and Pro Comp 76cc iron heads. These are a good choice for medium performance levels, where saving weight is more important than bottom end torque, such as lightweight drag cars and gearbox airboats, but you aren't going for maximum power. CNC porting is available, if you need more airflow, but don't have the room for the extra inch of intake height the Boogie Man heads will give you, but they will still not be in the same league for power output.

[Read More](#)

Price: \$3,599.00

AF81420 PRO/COMP HEADS LARGE CHAMBER

SKU: AF81420

PRO/COMP HEADS

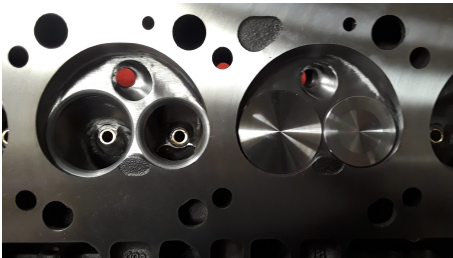

Large Chamber Heads. PRO/Comp cylinder heads also feature fully worked ports, radiused guides, 2.19" intake valves, 1.85" exhaust Chromoly spring cups, dual valve springs, lightweight Chromoly retainers, and hardened valve locks. While the standard package is capable of amazing performance, we do offer (and recommend) upgrades to this package for certain applications, such as Inconel valves for turbocharged applications (the stainless valves are not bulletproof under high exhaust temps), titanium valves and retainers for high RPM roller cam setups, etc.

CORE CHARGE INCLUDED

Fall 2021 - Stock levels change frequently, the ETA for new orders for Pro Comp iron heads is roughly 1-2 weeks if not in stock.

[Read More](#)

Price: \$3,090.00

GS71102 FEL-PRO / SEALED POWER COMPLETE ENGINE BUILDER GASKET SET '68-'76

SKU: GS71102

Fel-Pro / Sealed Power Complete Engine Builder Gasket Set

'68-'76 472/500 CID, Does not include intake gasket or oil pump gasket, may not include rear main seal.

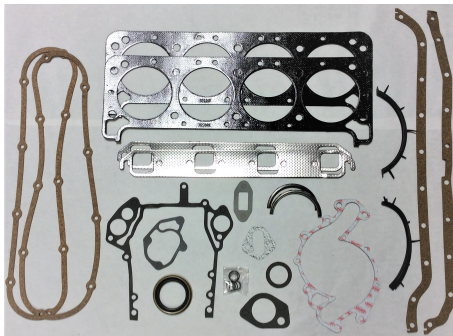

Note: All 472 / 500 / 425 / 368 kits include neoprene 2-piece rear main seals.

We neither sell nor recommend rope rear main seals for Cadillac engines originally designed for neoprene.

Warning: Some Fel-Pro / Sealed Power gasket sets come with a rope seal instead of a neoprene seal! We do not have any control over that - these sets are sold 'as packaged' by Sealed Power.

SKU: RB59115

'Skinny' Piston rings for 472 / 500 engines with Cad Company forged pistons.

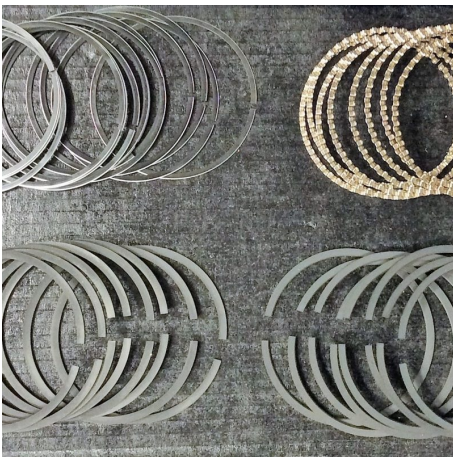

Narrow width (1/16" / 1/16" / 3/16") - These rings ONLY fit forged pistons intended for skinny rings. Not applicable to stock replacement or KB pistons, or most forged pistons aside from the current Cad Company off-the-shelf forged pistons or something custom-made-to-order for these rings.

Complete set (1 set per engine).

Only available in Moly, and only available in the sizes listed.

HARDWARE

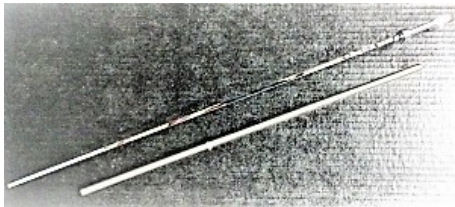

Stock heads will have 3 plugs per head. Read
More >>

2 per head will be the disc type (the hole will have a step so the plug can only go in so far). The third head plug will be one of the following:

- Disc style plug like the other 2 (mostly '68-'69 engines).
- The press in cup style (like a standard freeze plug) (some '68-'69 engines and 425 / 368 heads).

The 425 and most 368 heads will have one plug and one press in 90° heater outlet (no longer available) from the factory.

- Threaded head plugs (pipe thread) - usually one plug and one straight heater outlet (most '70-'76 engines)

RINGS AND BEARINGS

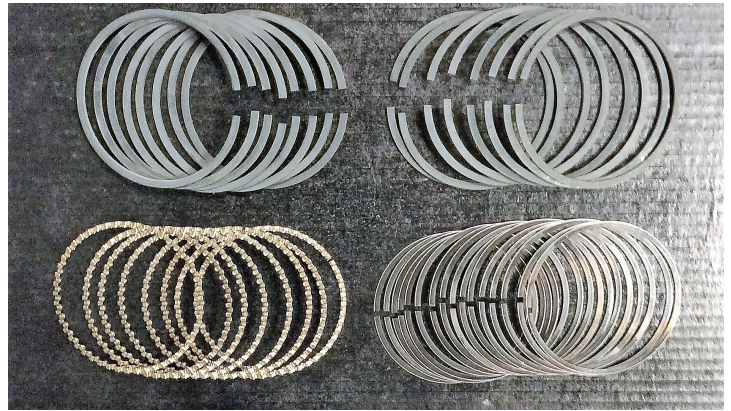

Here at Cad Company, we have torture tested a variety of different rings and bearings under a wide range of conditions. In some cases, a specific product *is* recommended over others - but not always what you'd expect.

Our Policy - We only sell rings and bearings that we use in our turn-key engines, and are willing to stand behind with one of the best warranties in the crate engine business.

Brands - In our experience, there is not any real benefit of one brand over another in most cases (and many of them are the same parts in a different box, anyway) - we simply don't offer the ones you don't want. Some sizes are only available in 1 or 2 brands. If you want a specific brand, we would be happy to accommodate you (if they are available in the size you need), but be aware that specifying a brand may result in a higher price, as we don't have the benefit of negotiating the best price for a volume order.

Cam Bearings - Cam bearings are not all created equal. Durabond bearings are the best choice for most builds, but there are situations where something different is called for. The Cad Company exclusive grooved cam bearings (pictured) are made to our specs by Durabond. They incorporate a groove around the outside to allow oil to flow around the the second hole, which allows oil to enter the bearing on the loaded side, decreasing the chance of bearing failure due to high spring pressure. They also have an oil clearance closer to the middle of the factory spec, instead of tighter like the other off-the-shelf bearings, eliminating the need to clearance the bearings during assembly. If you have a problem with the cam bearings 'smearing', these bearings are probably the solution.

Rod and Main Bearings - There are 2 'series' of bearings available for rod bearings - 'P' and 'H'. 'H' bearings are generally intended for race cars. They are a harder alloy, and will survive more abuse in the way of things like being hammered on by detonation, but they tend to result in increased crankshaft wear due to reduced embeddability. 'Embeddability' is the property of bearings where contaminants embed into the bearing material, and reduced embeddability means that those contaminants stay on the surface, where they can scratch the

crankshaft. We do not recommend 'H' series bearings for anything but the most extreme drag racing applications.

Coatings - There is a lot of contradictory information out there about the various bearing coatings available. We have not been able to verify any of these claims on dyno test engines. At this time, we do not offer coated bearings.

Rings - We prefer moly rings for most N/A applications. They seat quick, last quite well, and are (relatively) reasonably priced. Care should be taken when selecting rings - check the piston description for special ring requirements before ordering. Also, be sure to check the instructions for ring end gap that come with your pistons - those usually take precedence over recommendations found elsewhere. When in doubt, ask.

Crankshafts, Stroker Kits, Crank Hubs, and
Vibration Dampeners [Read More >>](#)

Cad Company does not sell stroked stock cranks by themselves - we only sell them as complete rotating assemblies. We do sell reconditioned and machined stock cranks, ready to install and aftermarket billet cranks (the same ones in our billet crank stroker kits, as well as made-to order).

Cad Company's stroker kits utilizing stroked stock cranks incorporate all that we have learned over 40+ years of building performance Cadillac engines, and our current recipe has been torture tested to nearly 2k HP. Most home-brew stroker cranks fail sooner or later (usually sooner) on engines making any real power - it's not as simple to build a reliable stroker crank as some would have you believe, but we have worked out the details to offer you a reasonably priced rotating assembly, without having to go through the trial and error method of figuring out what fails and what doesn't.

We offer 2 crank hub options. In most cases you will want the 'standard' hub. The offset hub was primarily for pulley alignment with an obsolete (no longer available) aftermarket dampener. Most '73-older (3-groove) factory pulleys are back-cut to provide clearance for the factory vibration dampener. Some '73-older and most '74-newer (2-groove) factory pulleys, as well as all aftermarket pulleys, are not. All factory hubs have the same spacing, and that's what the 'standard' dampener matches. If you want to use the factory dampener with a late or aftermarket pulley, the offset hub is your best bet, but it will generally require manually shimming the pulley for proper belt alignment (with a stock or standard replacement hub, you would have to machine the clearance into the back of the pulley, IF the pulley you are using has room to do so). You cannot simply use the offset hub and pull the hub outward for belt alignment, as the hub must be pressed on as far as it will go - there are a variety of likely failures if the hub is not pressed on all the way, it's just a matter of what fails first.

The only vibration dampener currently available is sold as a complete unit, with it's own unique hub (pre-assembled together). The

mounting face provides the same pulley alignment as the factory and 'standard' replacement hubs.

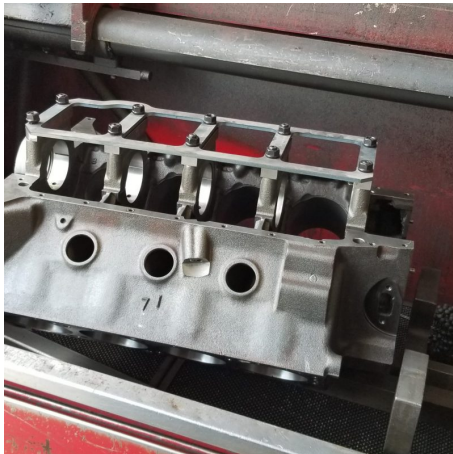

RB40111 CRANK KEY

SKU: RB40111

Crankshaft key for timing gear / crank hub for Cadillac 472 / 500 / 425 / 368 engines. The correct factory style key. Nothing special, just the right thing.

TS11209 EXHAUST BOLT REMOVAL TOOL KIT

SKU: TS11209

Manibolt Driller tool / fixture kit, makes removing broken bolts a 'snap', often without pulling the heads or engine out of the car.

With this precision tool you can drill and tap broken exhaust manifold bolts dead center and perfectly straight, every time, even if you can't see where you're drilling!

This kit fits all '68-'85 Cadillac 472 / 500 / 425 / 368 Cadillac engines.

Kit includes: Bushing Clamp (Qty 3, sizes 1/8 1/4 and 5/16), Drills and Taps (Qty 1 ea. 1/8 1/4 and 5/16 with 3/8-16 Tap), Knurled Thumbscrew for mounting Bushing Clamps, Modified 3/8-16 Stainless Flatheads (Qty 4), and a Rugged plastic case with laser cut foam fitted for dedicated placement.

For more information, see the detailed info tab.

You can also visit Beydler's website [here](#) for how-to videos and more.

VALVETRAIN

The valvetrain is an important part of any engine combination. Whether your engine is stock or full race, or anything in between, having a correctly matched, properly functioning valve train is of equal importance. If you are not sure which components are right for your engine, feel free to send us an e-mail or give us a call for a recommendation. Below you will find a variety of valves, springs, seals, and other timing components to put together a first class valvetrain.

Price: \$447.32

VT20350 SS 350 H CAMSHAFTS AND KITS - HIGH COMPRESSION (10:1 OR MORE) HOT-ROD STREET PERFORMANCE

SKU: VT20350

350 H series camshaft

This cam will generally put the meat of the powerband in the 2600-5800 RPM range. That means that for an exclusively drag-race-only application, you might want the converter to stall as high as 2600 RPM, and you would want to shift around 5800 RPM, if everything else is optimized for that RPM range. This cam runs great right off idle, as all real street cams should, and for applications involving street use, we recommend a more street-friendly stall speed for the converter.

Good ignition and exhaust recommended. Expect a hot-rod Idle. This cam is a good choice for truly streetable performance, as well as certain classes of gearbox-driven airboats.

Price: \$447.32

VT20350 SS 350 H CAMSHAFTS AND KITS - HIGH COMPRESSION (10:1 OR MORE) HOT-ROD STREET PERFORMANCE

SKU: VT20350

350 H series camshaft

This cam will generally put the meat of the powerband in the 2600-5800 RPM range. That means that for an exclusively drag-race-only application, you might want the converter to stall as high as 2600 RPM, and you would want to shift around 5800 RPM, if everything else is optimized for that RPM range. This cam runs great right off idle, as all real street cams should, and for applications involving street use, we recommend a more street-friendly stall speed for the converter.

Good ignition and exhaust recommended. Expect a hot-rod Idle. This cam is a good choice for truly streetable performance, as well as certain classes of gearbox-driven airboats.

VALVES

Swirl-polished oversize Stainless valves are available in full sets of (16) for all heads, 1968 through 1979. They are ready to install with 11/32" stems, and any competent machine shop in your area can machine the oversize hardened seats unless you are repairing a damaged head, nor do we recommend reusing stock valves. With the high nickel content of the Caddy heads, and stainless valves (which are very difficult to damage), you should be able to get many, many miles of trouble free operation from your upgraded heads, even on unleaded fuels.

OIL PANS

All oil pans are vatted, and checked for defects that would cause them to be unusable, such as excessive rust on sealing surfaces, cracks, holes, and severe warpage. These are 30-40 year old sheet metal parts, and are not perfect. Sometimes we have nice pans. Sometimes we

have fairly rough pans for a lower price (needing some elbow grease before use, but not requiring welding, etc). Sometimes we have both, and sometimes we have neither

Note: '77-up oil pans may require clearancing to clear the stroke of a 500.

OS11151 '80-'85 REAR SUMP OIL PAN ELDORADO 1 DRAIN PLUG

SKU: yOS11151

Oil Pans

REMAN EXHAUST MANIFOLDS

All reconditioned manifolds are cleaned, magnafluxed, shot peened, magnafluxed again, checked for flat gasket surfaces and machined as needed, and have new studs installed as needed. We do not weld up cracked manifolds for sale. Reconditioned manifolds are guaranteed to not be cracked at the time of delivery. New replacement left side manifolds are available ('68-'76 style, both Eldo and RWD versions). Note that most '68-'72 Eldorados have a unique side-exit passenger's side manifold, but most '73-up Eldorados used the same passenger's side manifold (down-exit) as the other cars. Please check the original manifold style on your car before ordering. Some passenger's side manifolds have an EFE valve, and some don't.
