Price: $447.32

VT20350 SS 350 H CAMSHAFTS AND KITS - HIGH COMPRESSION (10:1 OR MORE) HOT-ROD STREET PERFORMANCE

SKU: VT20350

350 H series camshaft

This cam will generally put the meat of the powerband in the 2600-5800 RPM range. That means that for an exclusively drag-race-only application, you might want the converter to stall as high as 2600 RPM, and you would want to shift around 5800 RPM, if everything else is optimized for that RPM range. This cam runs great right off idle, as all real street cams should, and for applications involving street use, we recommend a more street-friendly stall speed for the converter.

Good ignition and exhaust recommended. Expect a hot-rod Idle. This cam is a good choice for truly streetable performance, as well as certain classes of gearbox-driven airboats.
